I+ME VCI kit, complete with USB interface cabled to computer

2 Meter lead with J1962 socket

Pre-configured ready to use on 21 Vehicle Manufacturers

£2,495.00

Note

It should be noted that although Pass-Thru does connect to all newer vehicles and will give far more standard coverage than you would normally get from any aftermarket tool, it would be a mistake to think that you would replace your general service aftermarket tool altogether. You would find you were spending far more than necessary on subscriptions. It is our recommendation that Pass-Thru be used for more difficult or specific work to maintain the scale of economy.
