

The Complete Package

EVERYTHING YOU NEED FOR AIR CONDITIONING

Tecalemit AC3000 N9

Key Features

- Fully automatic
- Built-in Refrigerant Identifier
- On-board diagnostics
- Nitrogen pressure testing
- Certified to SAE J2788 standard
- Advanced vehicle database
- Concertina dye injection system
- Saniflux purification system
- Flushing system for removal of contamination
- Daily refrigerant management & usage report
- Built in printer
- Automatic air purge
- 22kg internal cylinder
- 100% high side recovery purge valve
- Optional 5 year warranty

Installation and Application

The N9 Tecalemit range of refrigerant handling stations are certificated to the new SAE refrigerant handling standard J-2788. This new technology ensures maximum efficiency in recovery and recharging. All of our machines are now supplied with a high side coupler which incorporates a purge valve to ensure no refrigerant is lost to atmosphere in accordance with the F-Gas regulation 842/2006. The AC3000 N9 unit is a fully automatic, high specification machine with a comprehensive range of features to ensure rapid vehicle servicing even in the most demanding workshops.

Saniflux

The AC2500 N9 PRO incorporates the new Saniflux ultrasonic evaporator cleaning system. You can now get rid of foul smells and kill all bacteria, mould and germs from the evaporator as an added extra to your workshop air con servicing.

High Precision

High precision is the new technology for improving recharging precision; increasing refrigerant recovery by up to 15-20% and guaranteeing the purity of the recycled refrigerant in accordance with SAE J2788

Diagnostic Pack

- UV Leak detection
- Standard Universal Dye
- Diagnostic Sight Glass
- Saniflux Liquid
- Safety Goggles

Electronic Leak Detector

Finds refrigerant leaks in the engine bay, or within the passenger compartment. One of the fastest methods of leak detection.

Sealant Detector

Checks for the presence of potentially harmful sealant products to prevent damage to your service machine

Safety Starter Pack

- Fluoroelastomer gloves
- Easy-Fill Dye
- UV Torch
- UV Glasses
- Bottle Connectors
- Digital Thermometer

F-Gas Training & Certification

(For 1 person, carried out at your premises within Mainland UK)

Since July 2010, it has been an offence to carry out Air Conditioning Servicing on Motor Vehicles without a recognised qualification to prove that you understand how the systems work, how to work with the refrigerant safely, and the implications for our environment if the refrigerant leaks out. Our training meets these requirements and gives you all the information you need in order to gain the qualification with IMI Awards.
